

CURRICULUM VITAE
Full-Stack Developer

Angelo

Level of English
Upper-Intermediate

Skills

- Visual Studio 2019;
- C#;
- VB.Net;
- .Net
- .Net Core 3.0;
- .Net 4.7.2;
- ASP.Net;
- MVC;
- Windows Form;
- WPF;
- MVVM;
- REST;
- WCF;
- SOAP;
- MSSQL;
- Oracle;
- MySQL;
- RedGate.;
- Entity Framework;
- ADO.Net;
- Javascript;
- JQuery;
- AngularJS;
- NodeJS;
- Xamarin (iOS and Android);
- Photoshop CS;
- Paypal;
- Stripe;
- Mercury;
- Transaction Express;
- Authorize.net;
- GitHub;
- BitBucket;
- Team Foundation Server;
- UI/UX
- Bootsrap;
- Metronic;
- JQuery UI;
- Telerik Kendo UI;
- LUIS.AI;
- Teams Bot.

Experience

C# .Net Consultant/
Lead Developer

Dec 2018 – Present

Offshore Company
Responsibilities:

- Estimating project requirements for project proposal;
- Maintaining existing Client sites;
- Architecting new systems before assigning tasks to developers;
- Reporting directly to company owner and project manager for project updates and team performances;
- Performing applicant interviews;
- Managing local System Development Team using SCRUM methodology;
- Performing code review;
- Assigning tasks to developers;
- Processing improvements;
- Setting-up PH Dev Team.

Technology used:

C# / VB.Net, Microsoft Visual Studio 2019, Framework 4.7.1, .Net Core, ASP.Net, ADO.Net, WCF, MVC, Bootstrap, Telerik Kendo UI, jQuery, Asp.Net Boilerplate Framework, Asp.Net Zero framework, Stripe Payment Gateway, Xamarin (iOS & Android), Bitbucket.

Projects handled:

Tozer iOS Application with Portal

Purpose of the application's for field staff to capture reported issues onsite facilities and for office staffs to assign estimator and assessor who will capture more details on the reported issues. Also, it had to provide tracking of progress for their customers. It has a REST API in Portal that Mobile uses to authenticate / authorize and get more information on a certain issue/job.

- Developed portal using ABP.IO / C# / Blazor;
- Developed mobile iOS using Asp.Net Zero Xamarin project;

OddJob Teams Bot

A bot that accepts command in Microsoft Teams to execute Azure VM commands like start, stop, restart and details of a virtual machine. It has a Core service which is a REST API hosted in azure that the bot sends client requests and the Core service is the one who performs the power shell commands against a VM.

- Designed and developed from ground up;
- Used Azure AD to authenticate users;
- Built on top of ABP Framework .Net Core technologies;

Bonnie Group Internal Management Portal

- Maintained existing Sales Management Portal for daily generation of reports integrated with SAP using an API to retrieve data for reporting purposes and store in local MSSQL.

Inner Range Dot Net Nuke Management Portal

- Maintained and expanded modules under Dot Net Nuke.

Avocado Australia

Management system that deals with monitoring sales and production of Avocadoes across the entire continent of Australia. It has a mobile app included to support users' (Growers, Traders and Packers) needs for daily updates on the system and maintaining profiles and sales report data. Has a build in CRM system to dynamically create entities based on user requirements built from scratch.

- Released 1 and 2, in progress going to Release 3;

Wildcat Issue / Release Management Portal

Mainly dealing with managing their clients' facilities on common and new issues with time tracking on how long an issue got resolved. Has a module for Releases that connects to AWS S3 for uploading and downloading files needed for site system maintenance. Has 2FA implementation using Twilio.

- Maintained Production Server;
- Created responsive design for mobile view;

Fendley HR Management Portal

- Worked with Production Server;
- Created HR management system to manage internal employees and sub con;
- Created the system that has a Form Builder to unlimitedly generate forms to be used by sub con for multiple purposes and Report Builder to generate dynamic reports based on the Forms created from Form Builder with specific permissions maintained on who has access to certain fields;
- Created a responsive design for mobile view;
- Worked with Audit Trail for Operations and Data Changes, QR Code for sub con authentication and cv pull;
- Maintained 2FA implementation using Twilio and Google Authenticator.

SES Time Keeping

- Maintained time keeping to measure gain and loss on projects being handled by the company;
- Created responsive design for mobile view;
- Worked with Audit Trail for Operations and Data Changes
- Created QR Code for sub con authentication and cv pull;
- Provided 2FA implementation using Twilio and Google Authenticator.

YouLend Lending Management

- Maintained multi-tenant commission based Lender and Borrower transactions;
- Performed stripe integration;
- Created responsive design for mobile view;
- Worked with Audit Trail for Operations and Data Changes;
- Made QR Code for sub con authentication and cv pull;
- Provided 2FA implementation using Twilio and Google Authenticator.

C# .Net Consultant
Jan 2016 – Dec 2018

POS Partners

Responsibilities:

- Reported all systems development activities to Chief Architect and Product Manager;
- Suggested and recommended best practice approach in developing a system;
- Coded and tested solutions in an enterprise level;

- Collaborated with the team of developers to finish a certain tasks;
- Managed team activities using SCRUM methodology;
- Helped/Coached other developers to remove blockade in systems development;
- Assisted with QA in testing the system end to end;
- Recommended new processes to system owners by providing document proposals and taking lead in discussion during management meeting;
- Provided suggestion, recommendation and comments to top management to further improve existing processes;
- Coded / Developed new projects using ASP.Net / MVC / T-SQL / Telerik Kendo UI / WCF / WPF / C# / VB.

Technology used:

C# , VS 2017 , Framework 4.5 , ASP.Net, ADO.Net , WCF, MVC 5, HTML 5, Bootstrap for responsive design , Telerik Kendo UI, Mercury Payment gateway, TFS.

Projects handled:**Serving Intel Enterprise**

The portal has the capability to sync large amount of data back and forth to their POS Server inside their businesses with proper handling of securities and channels.

- Worked with enterprise portal where all customers can login and view their local POS data, generate report, manage users and permissions;

Serving Intel Service

- Maintained a REST API service that allowed other application to connect to our Enterprise Portal with limited end points and being expanded as requested by customers.

SI Cloud Sync

- Worked with the Tool used to sync data between Enterprise Central Server and 3rd Party vendors.

POS Cloud Sync

- Worked with the Tool used to sync data between local POS servers and 3rd Party vendors.

Data Portal Pro (old)

- Synchronized data between POS Servers and Enterprise Central Server.

SI Agent

- Replaced Data Portal Pro, written in C# with Framework 4.6.1 from scratch with enhanced security and functionalities;

- Synchronized data back and forth between PO Servers and Central Server;
- Provided server monitoring capability;
- Maintained business On-Screen Ads management.

Mobile Reward System

- Developed using Xamarin (iOS and Android) for monitoring rewards earned on every purchase of items in restaurants,
- Earned rewards can be used to purchase items in store.

C#.Net Developer **ProjectThunder Inc.**
Oct 2013 – Jan 2016 Responsibilities:

- Developed core modules of e-commerce system like Shopping Cart, Checkout, Product catalog with basic and advance search, User profile, and Admin Portal for backend maintenance and processing;
- Integrated a payment gateway like PayPal express and flow pro, Mercury, Authorize.Net, and Transaction Express using SSL for the secured transaction;
- Integrated Shipwire, UPS, and USPS API for shipping cost computation;
- Developed back-end server processors to sync existing product and inventory records based on daily feeds from suppliers;
- Consumed and developed Web API and Web Services for inter-system connectivity;
- Developed and assigned new features of web and windows application to increase our client's monthly sales;
- Fixed bugs on web and windows application on a timely manner to promote clients' customer satisfaction;
- Recommended new processes to system owners by providing document proposals and taking lead in discussion during management meeting;
- Provided suggestions, recommendations and comments to top management to further improve existing processes;
- Scheduled conferences to meet customers' needs;
- Performed one on one Performance Review of Developers that corresponded to salary increases;
- Scoped new projects and determined the level of resources required;
- Ensured resources allocation and respect of deadlines;
- Led the team to provide solutions to problems and to longer-term improvements and solutions;
- Oversaw the design, integration, deployment, and other technical aspects of the development of, and modifications to, applications and information systems;

- Performed the role of Lead in Programming;
- Developed new projects using ASP.Net / MVC / T-SQL / Telerik Kendo / WCF / WPF / C# / VB.

Technology used:

C#/VB.Net , VS 2015 , Framework 4.5 , ASP.Net , ADO.Net , WCF, MVC 5, HTML 5, Bootstrap for responsive design , Telerik Kendo UI, Shipwire, UPS, USPS, Paypal Express, Flow Pro, Mercury, Transaction Express, Authorize.Net, Xamarin, TFS.

Projects handled:**Net Facilities Mobile App (using Xamarin and REST API)**

- Developed in Xamarin for field employees investigating and capturing critical information and images from different sites for the purpose of facilities maintenance.

BidMagic Proposal System

- Worked on a multi-tenant subscription based on windows app Proposal system.

BidMagic iOS (using xamarin and telerik controls)

- Create the mobile version of the windows app with limited features and capabilities.

Motorcycle House – Admin & Public site

- Developed multi-tenant eCommerce system from scratch;
- Worked with back-end office for maintenance of content, processing orders and generating business reports.

Anvil Brand – Admin & Public site

- Developed the same with Motorcycle house from scratch;
- Maintained full featured eCommerce system.

PG Everyday (for US and CA) – Rewards system

- Created 2-page application to handle Procter and Gamble Reward subscription.

Able Commerce websites (Volutone.com)

- Implemented 3rd Party eCommerce system.

Senior .Net Developer /
Team Head SDD1
Dec 2012 – Oct 2013

East West Bank Corporation**Responsibilities:**

- Led the 4 development teams on a day to day basis covering the whole spectrum of Software Development Life Cycle;
- Managed on-going and upcoming project requests coming from different Departments by delegating to System Analysts based on their respective group specialization;
- Managed, supported and developed the 4 Teams of Analyst and Programmers within Information Technology Group (ITG) to deliver an outstanding customer focused service;
- Coordinated the group on approaches to solve common and complex tasks;
- Implemented coding and documentation standards;
- Directly reported to VP of IT and AVP of SDD1 for Team/Project updates, issues and concerns;

- Oversaw the design, integration, deployment and other technical aspects of the development of, and modifications to, applications and information systems of East West Bank;
- Carried out effective and timely performance management of the Applications Development Team members in line with East West Bank Service Level Agreement (SLA);
- Maintained and continually improved application and software delivery methods and standards across all ITG projects under SDD1;
- Developed and maintained professional credible relationships with key internal stakeholders, including relevant third parties (vendor) and strategic suppliers;
- Recommended and assisted with developing improvements around processes, tools, standards and the overall quality of work produced by the Applications Development team;
- Maintained version control, configuration and defect management activities for all code developed;
- Worked with the ITG PMO (Project Management Office) for allocation of work and resources for application development related activities;
- Participated in estimating (time, cost and resource requirements) and planning of proposed solutions.

Technology used:

C#.Net, VS 2008/2010/2012, Framework 4.0 & 3.5, ASP.Net, ADO.Net, WCF, MVC 4, Console Application.

Projects handled:

- **Retail & Corporate Internet Banking**
(<http://www.eastwestbanker.com/>)
- **Bills Payment**
- **Check Order System**
- **Queue Management System**
- **Self Service Passbook Printing**
- **Check Depot**
- **Money Exchange System**
- **Email/Survey Blast**
- **WCF Middleware**
- **CIB Industry Specific (BPO Enrollment, eSOA Upload, Generic Crossborder)**
- **Mobile & Phone Banking**
- **LAP Project Management System**

Enterprise Application
Distributed System
Consultant (Sr. C#
Developer)
Aug 2011 – May 2012

Fluor Daniel Philippines**Responsibilities:**

- Requirements gathering from requestor;
- Managed timeline;
- Solution(s) Proposal;
- Set Meetings and coordinate with Project Manager in Greenville;

- Coded and did unit testing;
- Maintained deployment of application to test environment;
- Maintained software Support.

Technology used:

C#.Net,VS 2010,Framework 4.0 & 3.5, ASP.Net,ADO.Net, SQL Server 2008 R2, WCF, MVC, Engineering Tools.

Senior C# Developer/
Consultant
Mar 2011 – Aug 2011

MicroOfficeSystems – Pettigrew Philippines**Responsibilities:**

- Maintained/Upgraded/Enhanced existing windows applications.

Projects handled:

- **GM Scan**
- **HL72MD**
- **Patient Merge**
- **Admin Util**

Senior C#/VB .Net Web
Developer
Dec 2006 – Feb 2011

Venture CD – Apt IT Solutions**Responsibilities:**

- Initiated the standardization of documents, processes and coding pattern;
- Created their new 5-tier architecture in dotNet 2003;
- Coordinated with PM in the US for the standardization;
- Managed development of Report Generator with 2 programmers;
- Managed development of Client Mall with 1 programmer;
- Researched/Recommended/Designed Case Worker application for upgrade in our existing system;
- Researched/Recommended/Designed Form builder application for upgrade in our existing system;
- Researched and Created the Design Documentation for ClientMall Public Web Site and Client Admin Web Site (network: CJ, LinkShare, Share A Sale and GoogleNetwork);
- Supervised the Implementation of Design Document of ClientMall for 6 months;
- Developed the Client Admin Web Site;
- Maintained the management of the Client Mall and Client Admin for Modification purposes;
- Worked with a Console Application to download promotional Links from Commission Junction and Linkshare.

Technology used:

VB/C#.Net 2003,ASP.Net 2003,ADO.Net 2003, SQL Server 2000.

Projects handled:

- **Case Worker;**

- **Group Manager;**
- **User Directory;**
- **Contacts manager;**
- **Site Statistics Report;**
- **Form Builder;**
- **Report Generator System Design;**
- **Client Mall System Design.**

System Architect /
Lead Developer
Aug 2006 – Dec 2006

NetWeb Corporation – Primetech

Responsibilities:

- Developed the System Architecture of the MOHIS using VS2005 VB/ASP platform;
- Documented the System Architecture of MOHIS;
- Analyzed business flow and documented the system flow and Functional Specification of Hospital Information System;
- Developed forms for Personnel Status Report Monitoring, Technical and Functional Test scripts Template, and other documentation needed for operations;
- Consolidated the Weekly Status and Daily Status Report for Employee Payroll;
- Designated as next in-line when project manager is not around;
- Temporarily performed the position of system administrator.

Technology used:

VB/C#.Net 2005,ASP.Net 2005,ADO.Net 2005, SQL Server 2005.

Projects handled:

- **Hospital Information System;**
- **System Administration Module (Content Management).**

VB .Net Web Developer
Mar 2006 – Aug 2006

United Parcel Service International General Service Co.

Responsibilities:

- Worked with documentation of Asia Billing Project from End to End Development;
- Managed the Project and Milestone timeline;
- Developed the Database Design (ERD & DATADIC);
- Created Proposals for System Enhancements;
- Set Meetings with Requestors for Project Acceptance;
- Conducted Unit Testing on Asia Billing;
- Developed the Region IS Framework with Documentation Guideline, to be used by all developers for the whole ASIA Pacific Region;
- Developed the RIS Framework Architect.

Technology used:

VB.Net,C#.Net,ASP.Net,ADO.Net,ASP Classic, SQL Server 2000.

Projects handled:

- **Asia billing Automated System;**
- **Region IS FrameWork.**

VB .Net Web
Developer/ Consultant
Nov 2004 – Mar 2006

SMART Communications, Inc.

Technology used:
VB.Net, ASP.NET, ADO.NET, ASP Classic, SQL Server 2000.

Projects handled:

- **QCON – Queue Consolidation;**
 - **Security Services – Web Service;**
 - **CSIS – Online Service Request;**
 - **CSIS – Inventory;**
 - **CSIS – Merchandise Monitoring;**
 - **Zapper Interface for ICON and Wireless Center;**
 - **Project Management System;**
 - **EAPS Reporting Tool;**
 - **Service Level Indicator – WEB and PDA;**
 - **Validation Reports;**
 - **User Management System;**
- **Online Project Management – Interface and Architecture.**

Reports:

- **MySmartTools – Jwalk Backlog Report;**
- **Request Report – CSIS-OSR;**
- **Duration Report – CSIS-OSR;**
- **Audit Trail Report – CSIS-OSR;**
- **Cycle Report - CSIS-OSR;**
- **Email & SMS Report – CSIS-OSR;**
- **Agent Summary Report – Validation;**
- **Wireless Summary Report – Validation;**
- **SLI Summary Report – SLI WEB-PDA;**
- **Qcon Dynamic Report Generation – Qcon Project.**

VB .Net Web Developer
Nov 2004 – Mar 2006

Philippine Port Authority – Unisys

Technology used:
VB.Net, ASP.NET, ADO.NET, SQL Server 2000
Projects handled:

- **Project Suspension and Resumption;**
- **Project Weekly Dredging;**
- **Project Monthly Dredging;**
- **Project Release of Retention Money.**

Reports:

- **Closed Projects with Outstanding Issues;**
- **Suspension and Resumption Reports;**
- **Summary of Dredging Accomplishment and Status;**
- **MPFS Summary Reports.**

Education

De La Salle University
2001 – 2003

Master of Science in Information Technology

**Bethany Baptist Bible
College**
2002

Theology Course

Ama Computer College Bachelor of Science in Computer Science
1995 – 1999

Trainings

Active Learning Course 670: Agile Project Management with Scrum.

EastWest Bank Performance Coaching Workshop.
